

Program Learning Outcomes BIOLOGY

A student graduating with a B.S. in Biology from Wilberforce University will be able to:

- Demonstrate a working knowledge of the foundational concepts of biology; including cellular, organismal, and evolutionary biology.
- Apply methods of scientific inquiry related to techniques and equipment in biological and chemical investigations.
- Use critical thinking skills and the scientific method to evaluate and interpret quantitative data.
- Clearly write about biological information synthesized from multiple sources including primary scientific literature.
- Clearly present biological information synthesized from multiple sources including primary scientific literature.
- Demonstrate career readiness skills necessary to smoothly and effectively transition into an entry level position or graduate program in or related to Biology.
