

Program Learning Outcomes COMPUTER ENGINEERING

A student graduating with a B.S. in Computer Engineering from Wilberforce University will be able to:

- Apply knowledge of the fundamentals of physical sciences, mathematics and engineering to solve computer engineering problems.
- Apply the techniques, skills and tools of modern engineering effectively in the practice of computer engineering.
- Design, conduct, analyze and interpret results of computer engineering experiments.
- Convey engineering information either written or orally to diverse audiences.
- Understand the professional, ethical and social responsibilities of applying solutions to computer engineering problems.
- Demonstrate career readiness skills necessary to smoothly and effectively transition into an entry level position or graduate program in or related to Computer Engineering.
