

Program Learning Outcomes

INFORMATION SYSTEMS AND OPERATIONS MANAGEMENT

A student graduating with a B.S. in Information Systems and Operations Management from Wilberforce University will be able to:

- Understand the role of operations management and information systems in achieving business competitiveness through informed decision making, analysis and synthesis of business information and systems.
- Think critically and creatively to identify, formulate and solve problems involved with information systems and operations management.
- Apply technical competencies in the evaluation of strategic alternatives and to communicate these strategic alternatives using appropriate delivery methods.
- Work effectively within multi-disciplinary teams.
- Recognize the need for life-long learning in the field of information systems and operations management.
- Demonstrate career readiness skills necessary to smoothly and effectively transition into an entry level position or graduate program in or related to Information Systems and Operations Management.
